

# LOW TORQUE ADAPTATION TOOL

Critical security parts require traceability, whether the torque is small or large. This tool helps you achieve better quality with automobile industry products, including sensors, cables, and airbags, as well as products for the aircraft and home electronics industries.

## Lever Start Type

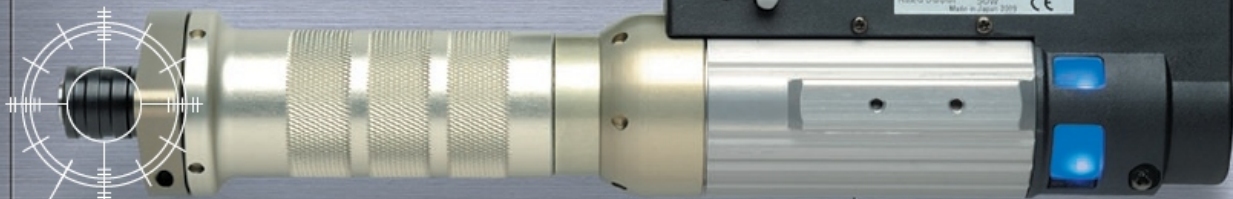

Push the lever to activate the tool, and release it to stop.

## Push-to-Start Type

Push the bit onto the screw to activate the tool, and release it to stop.

## Pistol tool (EH2-R0005-P)

## Bit Holder

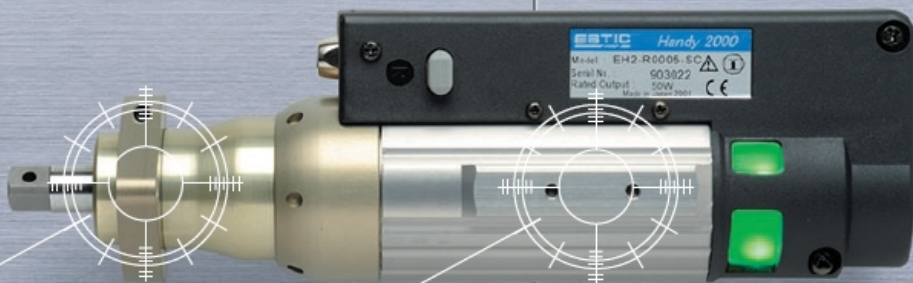

Slide-and-latch – Easily fit and remove the bit holder.

Two options to activate the tool – Lever start and push-to-start.

**ESTIC Handy 2000**  
Model: EH2-R0005-SP  
Serial No. 903019  
Rated Output 50W  
Made in China

EH2-R0005-SP (Push-to-start type)
